

STAR discussion meeting on the inner and forward tracking upgrade (Part I)

Overview of meeting

D. Majka: Overview of the STAR future upgrade plans

D. Lynn: Report on status and future of STAR SVT/SSD

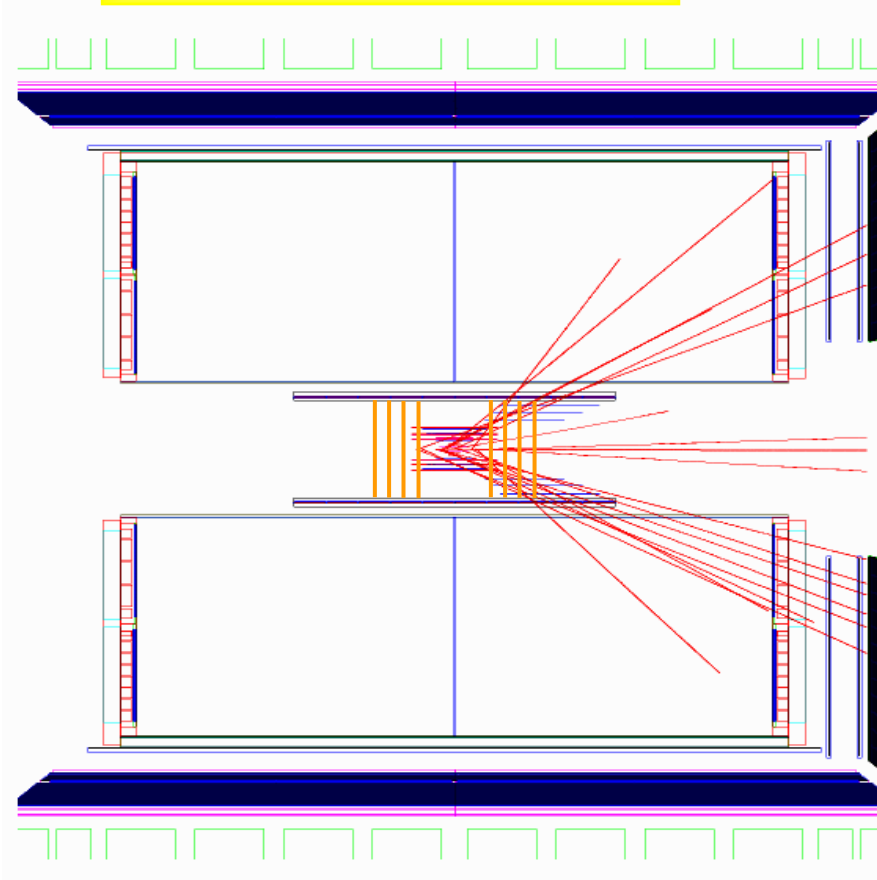

J. Kiryluk: W event kinematics

S. Vigdor: Overview of pp physics topics

K. Schweda: Overview of Au-Au physics topics

H. Wieman: Report on Pixel activities

N. Smirnov: Possible layout of a new STAR tracking system

M. Miller: STAR tracking software

G. v. Nieuwenhuizen: MIT Silicon laboratory

R. Milner: MIT-BATES infrastructure

N. Smirnov: Report on GEM activities

B. Surrow: Overview of silicon strip detectors (ZEUS/CMS)
